

# Immutable trust in quant

We **prove** that quant investment models are accurate & trustworthy

VERIFIED BY BLOCKCHAIN

## Can you trust quant?

Quantitative models drive the majority of today's trade volume:

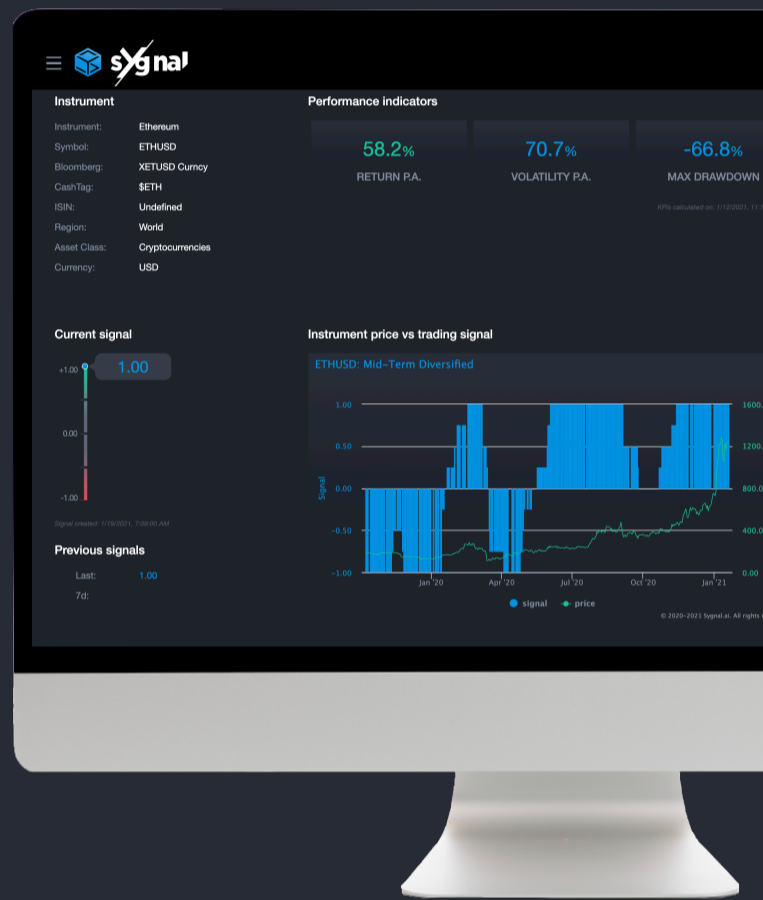

And yet, anyone can create a model that perfectly fits the curves ex-post, which **will not work ex-ante**.

## What we do

We are an **independant** auditing service for investment data.

We automate much of auditing process for a **fraction of the cost** of traditional firms.

Our tools allow end-users to **quickly & accuratly** verify any track record.

## Our solutions benefit

Funds & quant managers

- ✓ **Dramatically reduce** third-party auditing costs
- ✓ **Establish trust** with investors
- ✓ **Improve** sales lead times

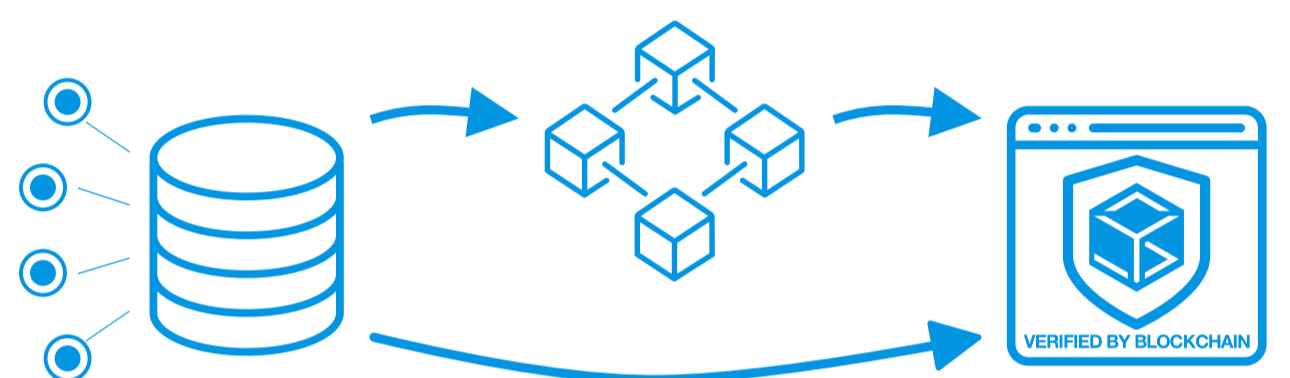

Investors

- ✓ **Verify** the accuracy of a quantitative model's track record
- ✓ **Gain trust** in the information upon which they base their investment decisions

## SYGNAL by the numbers

<b>+140 Million</b> Quantiative signals stored	<b>+9000</b> Signals hashed daily	<b>+56,000</b> Audited track records
---	--------------------------------------	---

## How it works

Collect, hash, and store **quantitative signal data**

Render the data **immutable** by publishing it on the blockchain\*

Provide tools to **verify & audit** data and track records

*\*Only hashed data is published on-chain. Raw data is only made available to authorized end-users*

## About us

SYGNAL is owned and operated by **Sanostro**, a German and Swiss-based financial data service & technology firm founded in 2013.

Sanostro is supervised by SRO-VQF in Switzerland, and the SEC in the United States.
